

Fund choice guide
Historical product range
Quarter 1 2024

The Pinnacle Range

The Pinnacle Range is a group of funds we have selected to help you achieve your financial goals. You will have the freedom to pick and choose from the entire range (subject to a maximum of ten funds at any one time).

The Pinnacle Range consists of internal funds offered by Countrywide Assured plc (“Countrywide Assured”) and funds that are managed by external fund managers. For these external funds, Countrywide Assured set up a mirror fund that invests directly in the underlying fund and clients hold units in the mirror fund. As the name suggests, mirror funds ‘mirror’ the performance of the underlying fund that they invest in.

The unit price of the mirror fund will be different to that of the underlying fund. This is due to the fact that mirror fund is launched on a different date to the underlying fund. The starting price at launch is also different (usually 100). Performance of the mirror fund compared to the underlying may slightly differ due to differing charges and cash holdings required to facilitate fund flows.

Mirror funds are marked with the symbol “■” in the following “Fund links available under our Pinnacle Range” document.

There are implications to the limits of FSCS compensation if you hold a mirror fund. Should the external fund manager or company be deemed in default no claim can be made under FSCS. If, however, Countrywide Assured is in default, the value of any investment held in external funds would still form part of a claim under FSCS.

The full policy with further detail can be found via the following link:
www.countrywideassured.co.uk

Contents

4	Fund links available under our Pinnacle Range
5	Key benchmark movements and economic indicators
6	Pinnacle Range of funds: pension (portfolio)

15	Pinnacle Range of funds: life (pre-portfolio)
18	Explanation of terms

This guide is for our:

- Policies taken out between February 1994 and January 2007 (portfolio product range)
- Policies taken out between April 1977 and February 1994 (pre-portfolio product range)

Please see the separate *Fund choice guide* covering our current product range:

- Self-Invested Pension Portfolio (taken out after January 2007)
- OneSIPP
- Transfer Pension Portfolio (taken out after August 2007)
- Investment Portfolio (taken out after February 2008)
- Versatile Investment Portfolio
- ISA*
- Offshore Bond (see note 7 on last page)

Please also refer to our separate *Fund choice guide* for closed funds.

Fund links available under our Pinnacle Range

Past performance is not a reliable indicator of future results. The value of investments can go down as well as up and may be affected by exchange rate variations. As a result, the benefits available under any policy/account linked to the fund may be lower than anticipated. You may not get back the amount originally invested.

Pinnacle Range of funds: pension (pre-portfolio)

Past performance is not a reliable indicator of future results. The value of investments can go down as well as up and may be affected by exchange rate variations. As a result, the benefits available under any policy/account linked to the fund may be lower than anticipated. You may not get back the amount originally invested.

Explanation of terms

Quartile rank (Qtl)

Quartile rank is a rating of performance on a scale of 1 to 4, where 1 is best and 4 is worst. The entire performance range of a sector is divided into 4, with each quartile rank corresponding to 25% of the range.

Sector

We have classified all of our funds using the Investment Management Association (IMA) sector classifications, as well as by creating additional sub-categories, in certain circumstances, for enhanced clarity.

The IMA maintains a system for classifying funds as there are over 2000 investment funds available for sale in the UK. The classification system contains approximately thirty sectors grouping similar funds together. The sectors are split into two categories, those designed to provide 'income' and those designed to provide 'growth'. The sectors are designed to help you find the best fund(s) to meet your investment objectives, and to compare how well your fund is performing against similar funds. Each sector is made up of funds investing in similar assets, in the same stock market sectors, or in the same geographic region.

Performance

We show the performance of each fund on a 12-month total-return basis.

This is the actual performance of a fund over a particular period. We use five (subject to availability of data) 12-monthly periods, for example, percentage growth over one year ending 31 March 2020, 2021, 2022, 2023 and 2024.

Fund adjustments: Adjustments were made to the unit prices of the various series of the SIP Managed fund in Q4 2021 and Q2 2022 and the SIP International Equity fund in Q4 2021 to correct an error in the allocation of assets between the different series of the funds. The total assets of each of the funds are managed together which are then allocated to the different series to calculate the daily unit prices. The allocation error compounded over time resulting in the need for the adjustments to unit prices. Whilst the overall value of the funds' assets, and therefore the actual performance of the funds, are unaffected the adjustments will affect the disclosed performance figures, where it includes this adjustment, of the different series of funds. Note: the series invested in will depend on when the product was taken out. Daily unit prices for the different series are available via the Countrywide Assured website.

Open to new business

Where a fund is closed to new business, your existing holdings will remain in this fund, unless you ask us to move these to another fund. In most cases, if you are paying regular contributions to these funds, they can continue to be invested in them.

Please also refer to our separate *Fund choice guide* for closed funds.

Annual management charge (AMC)

The AMC quoted includes the fund manager's management fee, but excludes the fund management fees associated with the underlying holdings and VAT which are incorporated into the total expense ratio (TER). Neither the AMC or TER incorporate charges associated with the policy, please review your individual policy statement if you require a valuation that incorporates all policy related charges.

Some funds include a performance-related fee. This fee is not included in the charge shown, but is reflected in the fund performance. Funds in respect of which performance-related fees apply are indicated in the *Fund choice guide* with a ▲. For further details, please refer to the relevant fund fact sheet, or see below for Countrywide Assured's funds.

Countrywide Assured may also receive rebates or commission from fund management companies for the distribution of their funds. However, these will be paid by the fund managers out of their fees, and this will not represent an additional charge to the funds.

Total expense ratio (TER)

A TER represents the drag on a fund's performance caused by all annual operating costs (including audit and legal fees and VAT). In other words, the TER is the annual percentage reduction in investor returns that would result from operating costs if markets were to remain flat and the fund's portfolio were to be held and not traded during that period.

The TER figures quoted exclude any product charges.

Sanlam Investments and Pensions' funds

SIP Managed Fund

A performance-related fee will be payable if the fund's performance, measured against that of a peer group of funds and over the preceding 12-month period, ranks in the top half of the peer group. In these circumstances the performance-related fee will be 7.5% of the basic fee. Alternatively, if the fund ranks in the top quarter of the peer group, the performance-related fee will be 30% of the basic fee. However, irrespective of the performance over the preceding twelve month period, no performance related fee will be paid if the fund's performance, measured over the preceding three month period, ranks the fund in the bottom quarter of the peer group.

Other SIP funds

A performance-related fee will be payable if the fund's performance, measured against that of a suitable market index benchmark and over the preceding three-year period, returns in excess of a suitable hurdle rate above the market index benchmark. In these circumstances the performance-related fee will be 20% of the basic fee. However, irrespective of the performance over the preceding three-year period, no performance-related fee will be paid if the fund's risk as measured by the volatility of the funds' returns compared to the market index benchmark, measured over the preceding three-year period, is higher than the mandated maximum level for the fund.

Notes

1. Please note that all of the funds shown in this *Fund choice guide* are Countrywide Assured's insurance funds and therefore the performance of these funds will vary from the performance of the underlying collective investment schemes. In addition, the performance of the pension, ISA and life versions of these funds will vary due to the tax levied on life funds and also differences in the fund charges. Countrywide Assured reserves the right to revise its charges at any time.
2. All performance figures shown are annual growth figures.
3. Where past performance figures have not been shown, they do not exist for the relevant period.
4. Fund performance data is on a bid to bid basis; with income (net for life funds, gross for pension funds) reinvested up to 1 July 1997 and net of the appropriate tax for life and pension funds from 2 July 1997.
5. The information in this document is correct at 31 March 2024. Whilst every care has been taken in the preparation of this document, Countrywide Assured does not accept any liability arising out of error, inaccuracy or mis-statement contained in it.
6. For funds marked with a ■, these funds are Insured Mirror Funds.
7. Please note that funds marked with ++ are deemed as 'cash-like' investments. Cash is the least risky asset type, but cash tends to deliver low returns. This means the value of your money can be reduced in times of high inflation and in real terms, there is a risk that the spending value of your investment will be reduced by inflation over time. If you are planning to invest for the longer term i.e. more than 5 years, you will need to consider whether these investment choices are likely to sufficiently meet your personal financial objectives.

Important information

Past performance is not a reliable indicator of future results. The value of investments can go down as well as up and may be affected by exchange rate variations. As a result, the benefits available under any policy/account linked to the fund may be lower than anticipated. You may not get back the amount originally invested.
